Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 74-78,83-92,96,97,102 and 103 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ayers-2003/0074081 in view of Preissman-2001/0012968.

Ayers discloses a biocompatible bone implant having a material with a pore density gradient along the length of the implant. However, it is not specifically disclosed that the implant includes a radiopaque material. Preisman discloses that it was known to place radiopaque materials in bone implants. It would have been obvious to have placed a radiopaque material in the bone implant of Ayers in order to be able to image the implant during implantation or at a later date.

Allowable Subject Matter

Claims 1-7,10,12-19,21-57,59-62,64-69 and 137-173 are allowed.

Claim 79 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.
